was not a debacle but a "great victory" is highly debatable. Both he and former CIA Director Allen Dulles are right, however, in saying that the invasion left Latin America more alert to the danger posed by Castro.

That it has waited too long to do too little about the threat may be attributed to widespread pro-Castro sentiment among the lower classes and the general political instability of government in Latin America.

It is clear, nevertheless, that our government has foresworn unilateral action against Castro — at least until it has exhausted all possibilities of positive action within the framework of the OAS.
